Accelerate Your AI-Driven Enterprise

Juniper is realizing the AI-driven enterprise.

Deliver unparalleled user experiences and simplify operations by adding Juniper switches to your campus and branch locations running the Mist WLAN platform.

## Make Digital Transformation Deliver

Focus on the customer experience

Accelerate IT velocity

Protect and enable your business future
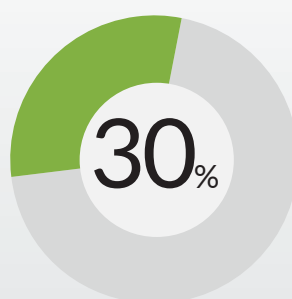

Relieve the IT Workload Pressures

AI and IT automation improve service reliability and scale while eliminating manual work.

45% Use IT automation now[1]

15% Plan to use IT automation in 12 months[2]

30% Of large enterprises will use AI for their IT operations by 2023[3]

3 Ways to Accelerate the AI-Driven Enterprise

With the power of Juniper Networks® EX Series Ethernet Switches and the Mist Wireless LAN Platform, IT can:

1 **Ensure an unparalleled user experience.** Extend the power of AI to deliver amazing user experiences across wired and wireless

2 **Use automation to save time and money.** The Marvis Action framework delivers driver-assist and self-driving actions across wired and wireless networks.

3 **Strengthen security in a mobile, IoT, and multicloud world.** Built-in security and threat intelligence safeguard the enterprise and swiftly stop attacks.

What the Analysts are Saying

" **Gartner named Mist a Visionary in Magic Quadrants for Wired & Wireless LAN.**[4] "

" **Gartner named Mist a Visionary in the Magic Quadrant for Indoor Location Services.**[5] "

" **Gartner named Juniper a Leader in the 2019 Magic Quadrant for Data Center Networking.**[6] "

" **We are excited to partner with an enterprise that shares our vision of one day relying on AI to drive all support calls and functions.** "

— Vishal Goradia, Senior Director of Networking and Technology, Gap Inc.
